Nigel Farage: We must be prepared to leave WHO over pandemic treaty (13 May 2024)

<https://www.telegraph.co.uk/news/2024/05/13/nigel-farage-world-health-organisation-pandemic-lockdowns/>

'Expensive, unelected, unaccountable' World Health Organisation has gone past its remit if it forces lockdowns on nations, he says.

(...) The WHO is proposing a pandemic treaty that would be legally binding on all 194 member states, and is pushing for mandatory lockdowns and vaccinations. It hopes to reach an agreement later in May. The Government has insisted it would never hand over authority to the WHO over whether lockdowns should be imposed, but Mr Farage says ministers should be prepared to go further and leave the Geneva-based body if necessary.

The Geneva Project - May 30 - June 1

<https://www.nationalcitizensinquiry.com/genevaproject>

Declare your sovereignty and independence in front of the W.H.O. Unity over tyranny. Love over control.

Excerpt: ... As the Commissioners (of the National Citizens Inquiry - NCI) wrote in their final report: "Through testimony, the NCI heard that the WHO is evolving into an organization that is less about promoting health and more about controlling the public health actions of its member countries. The problem with allowing the WHO to dictate health measures within any particular country is that each country may have its own view of what health is and the means by which health is to be promoted. The importance of this has been demonstrated over and over again in the NCI's weeks of testimony, which has laid bare a myriad of health problems that were created by Canada's pandemic response. The creation of this new Pandemic Convention is not a public process. It is being negotiated behind closed doors and will not be revealed to the public until complete. Some hearings have been conducted to allow input from

accredited institutions about what the convention should include, but there is no process in place to allow for people to dispute whether the process itself is necessary.

The following is excerpted from this [Brownstone Institute May 25th email](#).

Is It All Unraveling?

The past few days have been a whirlwind.

We've seen a torrential flood of information coming from Fauci's old office (with 155 pages of jaw-dropping emails) and the firing up of a global movement to stop the World Health Organization, which meets and votes next week.

Imagine this. The top heads of the public health agency of the world's most powerful military empire were joking about financial kickbacks and prostitutes while plotting to hide emails, even as they were telling the rest of the world to cancel Christmas due to a virus likely created in a lab that they funded.

You simply cannot make this stuff up. And this is likely just the tip of the iceberg.

Great injustice has been done to millions and billions of people. People were fired from positions for objecting, canceled for refusing the vaccine, injured from the lockdowns and shots, and had their businesses and arts associations ruined.

A generation of students has been traumatized. The standards of living of people around the world have been wrecked, with countless trillions transferred from the middle class to the rich. The stonewalling and censoring by the media, which has gone on for so very long, adds to public anger.

The carnage is our reality. But what are the chances that something good could come from this experience after all? They seem to be rising. A massively corrupt system is being exposed. More is coming out daily – but not from the mainstream press. It is coming from alternative sources.

For those of us who have been researching and writing about the public health disaster and everything associated with it for four years, these days have been enormously gratifying. Events now hold great promise for the future.

(...)

Following many terrible and destructive periods in history – World War I comes to mind – the perpetrators and the lessons faded away. Not much changed in the structure of government and industry to change the system. And the system became ever more exploitative and reckless as time marched on. As a force in changing history, the people became ever less enfranchised and impactful, and governments and their connected industrial allies became ever more powerful.

What are the chances that it will be different this time? We can say now with some confidence that it could be so. But what will make the difference is exposure and a shift in the culture of the ideas that inform our public life. The pandemic response was global, and so too must be the educational efforts that inspire change.

(...) For those of us who have been involved in intellectual and political life for decades, it is obvious that we face an unprecedented opportunity. The ruling class utterly broke the world starting in 2020, and they did so for nefarious reasons. There are many dark secrets that are coming to the fore, and some of the most powerful people and institutions in the world are dedicated to making sure they never come to light.

For those concerned about the future of freedom, this is truly an opportunity without precedent in our lifetimes.

How the WHO Plans to Take Over the World (March 20, 2024)

<https://healthfreedomdefense.org/how-the-who-plans-to-take-over-the-world/>

One of the best summary I've seen about what the WHO is up to. Give it a look!

EXCERPT...

While there are countless reasons this latest hijacking of power by the WHO must be opposed, the list below highlights some of the primary concerns and consequences entailed in the IHR amendments and Pandemic Treaty:

- Changes the existing IHR provisions from non-binding “advice” to legally binding regulations;
- Allows the WHO to declare a Public Health Emergency of International Concern (PHEIC) which can oblige national governments to “undertake” border closures, lockdown of individuals, mandated medical examinations and vaccination;

- Expands the WHO Director General's (DG) authority to unilaterally declare a Public Health Emergency of International Concern (PHEIC);
- Empowers Regional Directors to declare regional public health emergencies;
- Expands the definitions of what constitutes pandemics and health emergencies;
- Maintain a perpetually operative pandemic preparedness bureaucracy through the development of a "framework convention" that would establish a new \$30 billion per year international health authority. This new global health bureaucracy would choreograph the WHO's role in developing global "allocation plans for health products" (including vaccines);
- Require member States to support censorship and suppression of information that diverges or dissents from WHO opinions and directives;
- Sets up wide-ranging health surveillance systems in all member States, which WHO will monitor regularly through administrative mechanisms;
- Gives WHO control over some measure of country resources, including requirements for financial contributions to fund "capacity building and "technical assistance" structures by requiring a percentage of national health budgets be devoted to health emergencies as defined by the WHO;
- Removal of a clause that required regulations must be in accordance "with full respect for the dignity, human rights and fundamental freedoms of persons", and replacing it with a new clause that reads regulations shall be "based on the principles of equity, inclusivity, coherence and in accordance with their common but differentiated responsibilities of the States Parties, taking into consideration their social and economic development";
- Expands WHO's scope by emphasizing a 'One Health' agenda which includes a broad range of health, economic, social and political life which impact health, and therefore fall under the dictates of a declared international health emergency.

In addition to creating a multi-billion dollar self-perpetuating pandemic-preparedness industry, which will fund itself by looting the world's taxpayers, this latest power grab by the WHO and its globalist sponsors represents a fundamental threat to national, medical and bodily autonomy and is a clear and present danger to the citizens of the world. This entire process under which unelected delegates negotiate terms and conditions which would place people at the mercy of medical officers, public health bureaucrats and health enforcement gendarmes, who will be immune to any penalty for any acts carried out in the name of "public good," stands in direct opposition to, and are in direct violation of informed consent and stands in direct opposition to multiple long-standing national and international principles of medical ethics such as: CLIP

EXAMPLES...

U.S. Bankrolling Creation of Deadlier, More Contagious Bird Flu Strains (May 20, 2024)

<https://childrenshealthdefense.org/defender/united-states-bankrolling-creation-deadlier-contagious-bird-flu-strains/>

Under the guise of creating bird flu vaccines, U.S. government agencies and private funders like the Bill & Melinda Gates Foundation are bankrolling gain-of-function research to make bird flu viruses more lethal and transmissible among mammals.

Klaus Schwab to Vacate Top Post, as WEF Looks to Become Global Leader in Public-Private ‘Cooperation’ (May 21, 2024)

<https://childrenshealthdefense.org/defender/klaus-schwab-vacate-wef-global-leader-public-private-cooperation/>

(...) “If the Semafor report is correct, Schwab will still be the non-executive chairman of the WEF, so he’ll probably remain influential behind the scenes within the organization while occasionally making public appearances.”

(...) “Schwab is responsible for inaugurating the ‘stakeholder’ regime with the United Nations’ attendant ‘environmental, social and governance’ index that distorts markets and establishes a climate-change cartel to control all the world’s resources while reducing the standard of living for the vast majority and curtailing, if not eliminating their freedom.” Along similar lines, Seamus Bruner, author of “Controligarchs: Exposing the Billionaire Class, their Secret Deals, and the Globalist Plot to Dominate Your Life,” and director of research at the Government Accountability Institute, said Schwab is a “figurehead for the most powerful globalist interests — the ‘controligarchs.’” These “controligarchs,” said Bruner, “will continue plotting ways to dominate every aspect of our lives as their new figurehead rises.”

Worth a good look. The four latest articles by Meryl Nass from her [substack](#) (over 37,000 subscribers) with excerpts...

Meryl Nass is a physician and researcher who proved the world's largest anthrax epidemic was due to biological warfare.

“Dr. Nass is one of the great heroes in the movement for medical freedom. She has been telling the truth for decades and saved many lives in the process.”

“Meryl has been working for vaccine safety for decades and she has a wealth of knowledge to share”

“Dr. Nass has long provided individualized care for each patient's needs, and has researched military bioweapons and “accidents”. She has been punished for this, but it isn't working.”

What is the US global health security strategy and why does it look a lot like the WHO pandemic treaty?

Some screenshots with commentary so you can see what the US government has in store with or without the WHO

by MERYL NASS - MAY 20, 2024

<https://merylnass.substack.com/p/what-is-the-us-global-health-security>

This 60+ pager was issued in late April, mentioned once before, but here is the whole thing in a nutshell. The US Government will be paying 100 countries to implement “pandemic preparedness” and this will include many of the awful provisions in the treaty and amendments, ho ho ho.

Similar language as the treaty: reduce regulations and give a liability shield to the vaccines produced without a license.

Even very poor nations will be urged to use the same strategies that wiped out most local production of meat animals in the US: required vaccinations of animals and inspection of every animal by the USDA in far-off facilities.

Build high containment labs, find and sequence pathogens, and pretend that low resource settings can safely handle them. Propagandize about vaccines.

Promise them everything but when push comes to shove, make the developing nations borrow \$2 for every \$1 you give them. Get them in a debt trap.

Fool the public of rich countries by creating more and more “charities” that tax dollars will be funneled to in support of the biosecurity agenda.

Like I said, everything will come under the purview of “Health.” Such as censorship and propaganda.

We did it!!! 22 Attorneys-General in the US have told Joe Biden that the WHO will not be making public policy in their states!

by MERYL NASS - MAY 08, 2024

<https://merylnass.substack.com/p/we-did-it-22-attorneys-general-in>

For the thousands of people who have been making calls and writing letters--you are the best! Global governance will not be starting in the US!

This is HUGE!!!!!!!!!!!!!! Give yourself a shout-out if you helped make this happen!! But there is just one more ask. We need to stop this in the other 28 states. We need to pass the 2 bills that would require the treaty and international health regulation amendments to be ratified by the US Senate, where they will die... Because 49 US Senators have already made clear they will vote NO! - CLIP

COVID persists, but the COVID vaccine narrative has taken on so much water, the powers that be have stopped bailing, and are going to let these vaccines slowly sink

But what do they have in store for us next?

by MERYL NASS - APRIL 17, 2024

<https://merylnass.substack.com/p/covid-persists-but-the-covid-vaccine>

There has been so much bad news about the vaccines in the last few months, it even leaked into the mainstream media. I think the cabal's plan, at least in the US but probably everywhere, is to stop propping the ludicrous vaccine claims up and allow them to die a natural death. I explain why below. There was just too much bad news, too few getting boosted, too much resistance from parents. Getting 8 or 10 doses into everyone was not going to happen. The terrified obedient masses were becoming fewer and fewer.

(...) The fall of the vaccines means the fall of the vaccine passports. This ought to slow down the imposition of CBDCs and all-digital money for a bit. If we don't have to show our vaccine certificate to go shop, eat, etc., (and people stop being fearful of catching something from each Other) people will be a lot less inclined to "show their papers" to go about their lives. It's our job to explain over and over that this was how the Nazis maintained control.

(...) I do believe the cabal has bet the farm on their Reset, they can't go back, and they are simply moving on to another means of accomplishing it besides COVID. The over-the-top WHO Treaty/Constitution and its amendments designed to assume sovereignty over the world in the event of a pandemic is an ambitious Plan B. But I don't think it will fly. Too many people know the WHO was wrong about virtually everything regarding management of this pandemic, not to mention the 2009 swine flu. And then there was that little matter of WHO undertaking the SOLIDARITY Trial, in which WHO officials deliberately poisoned over 1,000 COVID patients with excessive doses of hydroxychloroquine and in many cases failed to obtain signed informed consents. The WHO could be liable for manslaughter.

Will Russia and China really agree to give up their sovereignty to Tedros? China, maybe. Brazil? India? Indonesia? Japan? Nigeria? Can all of their leaders, and their local power centers, have been sufficiently corrupted to turn over their nations to the cabal? I think that could be a stretch. I suspect the cabal will try their best to get a legal OK to take over the world with the upcoming WHO pandemic treaty, but it won't fly. Too many people already know about these plans. *After the WHO, the cabal will move on to something else, Plan C. Climate catastrophe? Yet more wars? Aliens?*

(...) We are finally understanding that the awful government policies were deliberate — intended to cement control over and impoverish us. But maybe we can start to build something a whole lot better. We are shaking loose of the educational indoctrination system, the ruination of our foods, the user-unfriendly and health-damaging healthcare

system. We are starting to grasp that our governments acted with malice aforethought to stupefy and eventually enslave us.

People are breaking free and taking responsibility for their future. Where I live, people are learning self-sufficiency skills, creating home-schooling coops, building greenhouses and growing food. The migration to the countryside was deliberate. A better life? It just takes everybody waking up. Despite all the acrimony we have faced, the time is ripe to help our fellows see things clearly. *We have to love them, help them, meet them where they are.* Maybe it is just to talk about the Gridiron dinner. Or ivermectin. They won't get it in a day. But keep trying. It is our only solution.

It's Official! CDC and UK government data reveal the COVID vaccines do not prevent cases, transmission, severe illness or deaths

by MERYL NASS - APRIL 3, 2024

Watch: How the Global Elites Are Pushing Us Into Techno-Totalitarianism

<https://childrenshealthdefense.org/defender/defender-podcast-w-scott-mccollough-pandemic-surveillance/>

As deadline nears, the WHO Treaty proposes a deadly biomedical threat to humanity

<https://gingerbreggin.substack.com/p/as-deadline-nears-the-who-treaty>

The WHO treaty, coming to a vote shortly, is recommending a system of WHO biolabs that pose an existential threat to life on Earth.

(...) If the treaty or the amendments are approved, it will be a giant step toward creating a more authoritarian WHO and an added step to creating a totalitarian global governance. But its proposal for WHO Biolabs is an immediate catastrophic threat to each and every one of us who live on Earth. The WHO proposes a system of WHO managed biolabs that will give the WHO overwhelming powers in regard to deadly pathogens in war and peace. And remember, the WHO is a stooge for the global predators. It's just one of several front offices, but as it demonstrated during COVID, it's a very influential one, and in the midst of an array of distracting controversies, it is proposing one of the most dangerous projects literally in the history of the world.

Stopping the WHO Biolabs is an overwhelming, immediate necessity. But overall, it's time to stop resisting this or that particular proposal for the treaties or the amendments. Instead, it's time to marshal our forces toward withdrawing from the UN and its agency, WHO, and to encourage other freedom-oriented nations to join us in fighting all manifestations of the global predators.

Did the WHO Water Down Its 'Pandemic Treaty'? Not Really, Experts Say

<https://childrenshealthdefense.org/defender/who-pandemic-agreement-ihr-amendments-deceptive-language/>

States Move to Oppose WHO's 'Pandemic Treaty,' Assert States' Rights

<https://childrenshealthdefense.org/defender/states-oppose-who-pandemic-treaty/>

Utah and Florida passed laws intended to prevent the WHO from overriding states' authority on matters of public health policy, and Louisiana and Oklahoma have legislation set to take effect soon pending final votes. Several other states are considering similar bills.

Could COVID Shots Trigger 'Avalanche' of a Contagious Form of Dementia?

<https://childrenshealthdefense.org/defender/covid-shots-contagious-dementia-cola/>

According to mounting data, one of the more serious side effects of the COVID-19 mRNA jabs may be dementia, and this previously nontransmissible disease may now be "contagious," transmissible by way of prions.

Invention Secrecy Act of 1951 EXPOSED - Why Are They Hiding 6,000 Patents From YOU?

<https://youtu.be/ml9Fz2aUx9k>

3 comments out of over 5000 comments

As a former patent researcher I can assure you that all major patent offices around the world have an office usually run by their military department that carefully scrutinizes all new inventions. If anything threatens the status quo, it's confiscated for reasons of "national security."

I actually did a translation for a friend of my dad's who was trying to patent a water powered lawnmower engine. He used it on our lawn. He never got the patent. The only thing he needed "oil" for was lubricant' for the parts. There is also Igor Brzynski who is a cancer researcher in Houston who has found a very good non harmful treatment for Cancer that effectively cures several types of cancer. The US Govt has been trying to throw him in jail to get rid of him for 30 years now. It's all the elites trying to keep their power. You can't make money from cured people.

Just imagine how advanced we would be if all these inventions weren't suppressed.

* * * * *

I watched this below because I love this guy - despite his unconditional support for Israel which, I hope, is only meant to ensure the all powerful Jewish lobby in the US isn't against him.

Who is Bobby Kennedy?

<https://whoisbobbykennedy.com>

But does he actually stands a chance to win come next November, in a country where so much election rigging appears to occur, where the filthy lying mainstream media are arraigned against him, where big money controls the government down to every single colonial war the USA has waged since World War 2?

I would like to believe it is possible. One thing sure, no hero will come along to fix all on his own what is wrong in this country and this world. If Bobby Kennedy is to win in this most challenging political environment and then go about to incrementally push through evolutionary changes that would tip the balance of power back to the people of this land, and become again a beacon of moral fortitude, fairness and kindness for the whole world, then he will need every free-thinking, heart-driven people on this planet to push along with him the wheels of change up the hill of our greed-suffused, violence-prone world, until we are through into a golden age of health, safety and freedom for all human beings.
