

Operation Grand Awakening - Part 1

Hello everyone!

I have a special treat for you today. In the wake of the numerous speculations around the world as to what could be behind the show of balloons and unidentified flying (or floating) objects that have been shot down by the US Air Force this past week, and which most mainstream media have covered a couple day ago, I felt this could be the precursor sign, not of [Project Blue Beam](#) that the late Wernher von Braun—father of the American lunar program—warned about, claiming that it would be used as the “last card” of the government to justify space-based weaponry, a motive that was later expanded to a fake alien invasion threat to rally humanity behind a One World Government and New World Order

(a conspiracy theory that has become “the number one trend on Twitter over the last few days” - see this [article](#)), but of something in fact totally *positive*.

I develop in the document *Full Disclosure Ahead* which you can read at https://www.earthrainbownetwork.com/pdf/Full_Disclosure_Ahead.pdf what feels to me like a more plausible explanation for what I consider to be a staged occurrence, reminiscent of many previous psyops that have coralled everyone’s attention to establish a narrative then used by the “authorities” to enable one of their many nefarious plans. But in this case, my hunch is that the sudden appearance of these three “objects”, that might have been construed as spy balloons from China, like the first one blown to smithers by the Americans, was in fact something orchestrated by the “good guys” in close collaboration with key members of the benevolent civilizations actively involved in facilitating what will soon transpire more and more openly.

I’m not the only one holding this view as you can see in **3 Days to What’s Coming in 2023 Webinar** at <https://exopolitics.org/3-days-to-whats-coming-in-2023-webinar/>

So I hope you will give a good look at this [8923 word document](#). Soon I will have more thoughts and material to offer you as a follow up to this introduction to what holds the potential to be a *very exhilarating time ahead*.

Jean
